## EXPERIENCE

### Frameable Inc, Senior Frontend Engineer — *Jan 2021 - Present*

Led the frontend efforts on both the marketing aspects as well as MVPs for three different products.

- Helped developers on their transition to learn Vue.js. Scaffolded initial app and best practices.
- Built customizable templates for our landing pages, with A/B testing for conversion tracking.
- Mentored junior developers by pairing with them as they worked on bugs and features.

### Plectica LLC, Frontend Engineer — *Apr 2018 - Dec 2020*

Focused on refactoring existing UI and simplifying the developer experience by building reusable components using BEM syntax; resulting in a much more cohesive user experience.

- Worked with designers creating a responsive design system using Atomic CSS architecture.
- Reduced styling codebase to less than half its size by getting rid of unnecessary dependencies.

### Aloft Ed. Inc, Senior Software Engineer — *Jul 2016 - Oct 2017*

Developed a data visualization library using D3.js, React and Apollo.

### Floship, Senior Software Engineer — *Mar 2015 - Jun 2016*

Worked as a full-stack engineer building the company's user-facing application as well as automating some of the operational needs.

- Designed and developed a WMS using Marionette.js and Django Rest Framework.
- Automated orders' approval and packaging processes.
- Integrated with third party services such as Braintree and 3D Bin Packing.

### The Recurse Center, Participant — *Oct 2014 - Dec 2014*

The Recurse Center is a free, self-directed, educational retreat for people who want to get better at programming. I mostly focused on improving my backend skills by writing some Node.js packages.

### NetSuite Inc, Software Platform Engineer — *Jun 2012 - Sep 2014*

Led a small team of developers in the implementation and maintenance of several core modules on the initial version of NetSuite's SuiteCommerce Advanced, a large Backbone.js application for developers to create E-commerce stores on top of NetSuite's existing CMS.

### SuiteCommerce, Web Developer — *Jul 2009 - Jun 2012*

Worked on highly customized E-commerce stores, catering to client specific business requirements.

## SKILLS

**Proficient** in the vanilla web stack: HTML, CSS and JS.
**Certificate in Advanced English** by Cambridge English.

## PROJECTS

### Knopf.css — *https://knopf.dev*

Modern, modular, and extensible CSS button library designed for both rapid prototyping and production-ready applications.
